

Please do not tamper with XM radio's ability to carry weather and traffic info. These issues deal directly with public safety and and restriction of such information to only certain types of broadcast media is irresponsible and foolish. Satellite radio will do to radio what cable TV did to local free broadcast. It is the future and it is here. It is such a valuable tool as people flee the public airwaves. I have had mine for several years and all my vehicles have one. That is all I listen to anymore. Please don't restrict its usefulness, both current and future, and its growth as a wonderful product.
